

## in humid areas, use **PUR-cables**

Works photo: Hüller Hille GmbH

The machinery and plant industries but especially the tool making industries are working particularly with mineral oils, alkalis and aggressive coolant emulsions and under difficult working environmental conditions.

Due to these conditions the electrical control cables, data cables as well as cables for trailing chains have to perform to exceptionally high standards. Flexibility, abrasion and oil resistance have to be guaranteed.

HELUKABEL® in co-operation with the leading machine and plant industries have developed suitable and application orientated cables.

PUR cables are tested among the others, mineral and synthetic oils, cutting oils, coolant emulsions, etc. For the operation in power trailing chains, these cables are tested to multimillion alternating bending cycles.

Consequently we believe that we can deliver the right cable for your application needs.
