

## Pre-assembled cable protection systems for robotic and handling systems

C

With over 25 years of experience with cables and lines, we have the right solutions for the demand placed by applications on robots and handling systems.

Our specialists select with you the correct cables, lines, supplemental systems, and cable protection system to be used with your specific application.

This involves manufacturing and development, as well as the metal components for handling; MAG welding; spot welding, whether as production solution, individual solution, or special solutions, as well as service and assembly.
