Application

Halogen-free, flame retardant cables are used as measuring and control cable in machine tools, conveyor belts, production lines as well as in plant installations, in air-conditioning and steel production works. For fixed installation or flexible application, directed without forcing by casual, not constantly recurring free movements and without tensile stress, for medium mechanical strain. This cable is suitable for the application in dry, damp and wet environments and also for laying on, in and under plaster as well as in concrete and masonry excluding in direct laying in shaked or stamped concrete, not suitable for imbedding in solidified or compressed concrete.

CE= The product is conformed with the EC Low-Voltage Directive 73/23/EEC and 93/68/EEC.
