Accessories ... 286-293

Panel Interface Connectors (PIC)

A panel interface connector (PIC) is a device that is mounted to the outside (exterior) of a panel that houses a PLC or computer. The PIC allows the user to interface the PLC or computer without opening the panel door, thereby, eliminating the potential safety hazards associated with having an open electrical panel.

The standard PIC contains one or more of the connectors that are commonly used to interface a PLC, computer or other devices that are commonly housed inside the cabinet. The connectors include, but are not limited to, D-subminiature connectors (9, 15, 25, 37 or high density 15 pin), RJ45, RJ11, DIN, BNC, USB and coaxial connectors. Any of these connectors are available alone in a PIC, with a power outlet, or with another connector.

Currently, we have over 2000 different units in production.

The catalog shows the most common types used today.

If you do not see what you require please contact us.

Custom versions are welcome.

Please send a sketch or drawing to the factory for a quote
or visit our website www.mencom.com

Standard configurations of the Panel Interface Connectors in NEMA 4 Enclosure (UL FILE # E183955)

- All connections are straight through, pin 1 to pin 1, etc.
- **All D-Subminiature** connectors are **FEMALE EXTERIOR and MALE INTERIOR**, referenced to the cabinet. Other configurations such as male exterior and interior are available.
- The 9 pin and 25 D-sub pin configurations are available as a break out configuration in some units. These connectors allow for the D-sub to be separated into individual lines. This allows the user to connect to the D-Sub by way of screw terminal connections.
- All "mini-DIN" and circular DINs are configured **FEMALE EXTERIOR and INTERIOR**.
- Many units are also configured for Allen Bradley's^{®*} Data Highway system. In this case the 9 pin D-sub and/or 8 pin "mini-DIN" are connected to a 3 pin pluggable terminal block commonly used with "BLUE HOSE" applications.
- The internal power connection is made via a covered terminal block with screw connections.
- The standard reset is a 3 amp to limit the power output of the unit. Other amperages are available, please consult the factory.

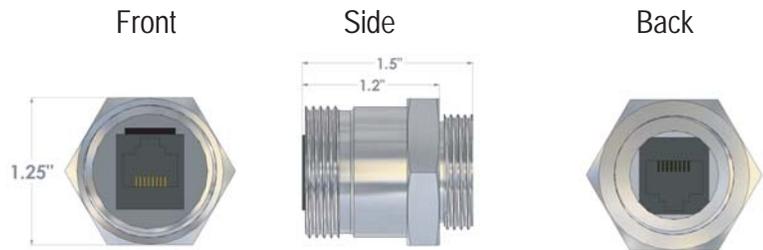

Panel Interface Connectors (PIC)

Port Adapters

Our smallest Panel Interface Connectors are ideal for tight spaces. The anodized aluminum housing has a connector potted inside and can easily be mounted to a cabinet through a 1" diameter hole. The M25 mounting thread has an O-Ring and Lock Nut (not shown below). A cap is supplied with each unit to make them suitable for washdown. Stainless Steel versions are available, please consult the factory.

Data Highway Versions

These panel interface connectors are designed to work with Allen Bradley's Data Highway System (or "Blue Hose") applications. The 9 pin D-sub is connected to the 3 pin pluggable terminal block (plug supplied) used on this system. Data Highway PICs are also available with international style receptacles. Please see the International Version of PICs.

Panel Interface Connectors (PIC)

International Versions continued

Australian (AS 3112-1981) Versions

Figure #	Description & Housing Size	Part Number
121	Australian receptacle in a size 32 housing.	DAS-32
122	Australian receptacle with a 9 pin D-Sub and a 3 AMP reset in a size 32 housing.	DAS-DB9-R-32
123	Australian receptacle with a high density 15 pin D-Sub and a 3 AMP reset in a size 32 housing.	DAS-DDB15-R-32
124	Australian receptacle with a 9 pin D-Sub and a 3 AMP reset. The 9 pin connector is connected to a 3 pin pluggable terminal block commonly used with Allen Bradley's Data Highway system (or "Blue Hose"). Includes 2 plug-in points for end-of-line termination resistor. This is in a size 32 housing.	DHAS-DB9-R-32
124A	Australian receptacle with a 9 pin D-Sub, RJ45 and a 3 AMP reset in a size 32 housing.	DAS-DB9-RJ45-R-32

The Australian Style Receptacles are also the common receptacles used in China.

Surface Mount Style

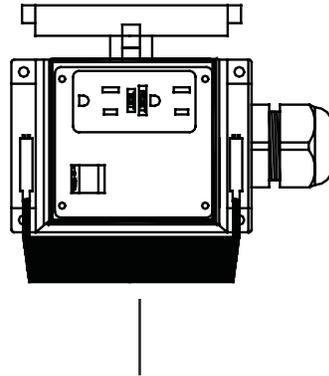

This style supplied complete in its own NEMA 4 Enclosure.

Panel Interface Connectors

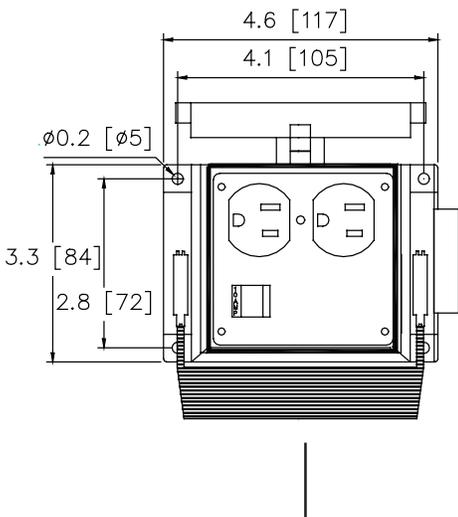

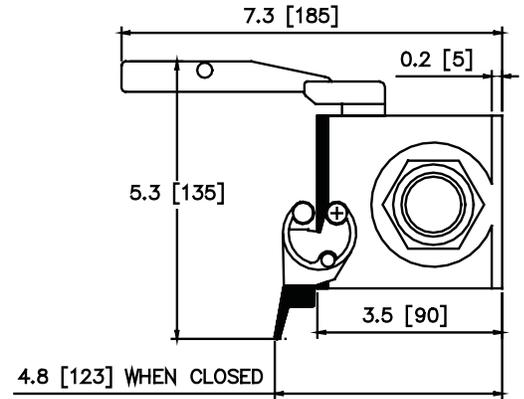

Part Number: **DP-10R-P32**

Duplex receptacle with a 10 AMP reset; size 32 surface mount housing. Includes Metal Cable Gland for cable O.D. range of 0.475" to 0.787".

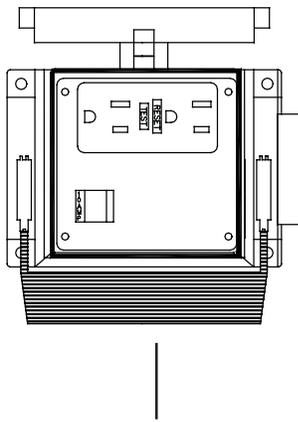

Part Number: **GF-10R-P32**

GFCI receptacle with a 10 AMP reset; size 32 surface mount housing. Includes Metal Cable Gland for cable O.D. range of .475" to 0.787".

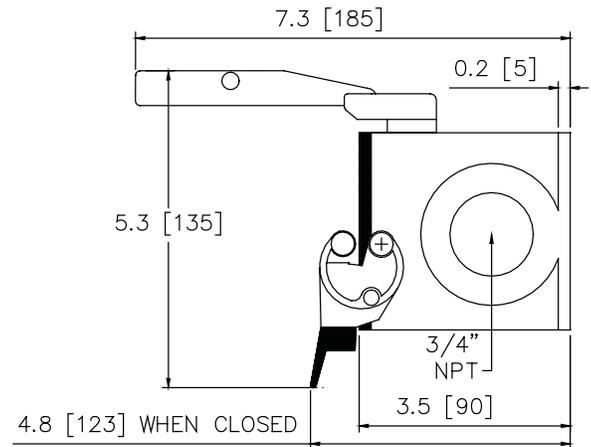

Part Number: **DP-10R-P532**

Duplex receptacle with a 10 AMP reset; size 32 surface mount housing. Single 3/4" conduit entry.

Part Number: **GF-10R-P532**

GFCI receptacle with a 10 AMP reset; size 32 surface mount housing. Single 3/4" conduit entry

Other versions in the Surface Mount Style are available, please consult the factory.

Panel Interface Connectors (PIC)

Male-Female D-Subminiature (D-Sub) Cables with Guaranteed Color Code

Mencom introduces a line of 9, 25 and 37 pin D-Subminiature connectors with a guaranteed color code along with a heavier wire gauge than is standard. These cables are especially useful for applications requiring a single ended D-Subminiature cable. Simply cut the end that is not required and use our color code chart to wire the free end. The heavier gauge wires (20AWG for the last four wires and 24 AWG for the remaining wires) allow the user to easily terminate the wires into standard terminal blocks. Crimp or solder inserts and shells are also available should the use require the reinstallation of a connector. For these accessories, see the previous page.

Specifications:

Cable Jacket: Oil Resistant Gray PVC
 Overmold: Oil Resistant Gray PVC
 Cable: 24 & 20 AWG with foil shield;
 20 AWG drain wire;
 last 4 wires are 20 AWG

Locking Bar and Padlock for Panel Interface Connectors

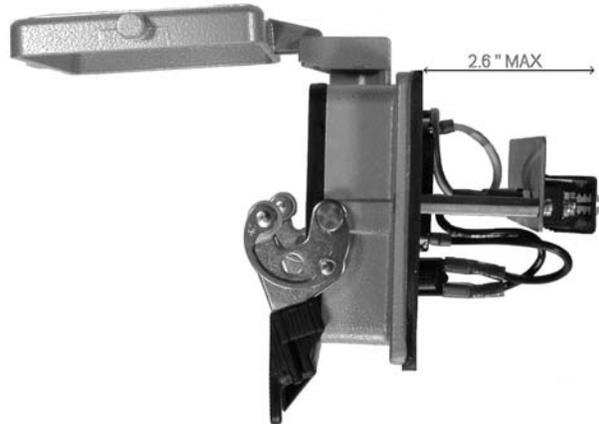

Part Number: **D-PIC-LOCK**

The Locking Bar and Padlock come as a kit. The bar is easily slid into the latch on the panel interface connector and the padlock is then attached through the open hole on the other end.

Panel Interface Connectors (PIC)

Notes

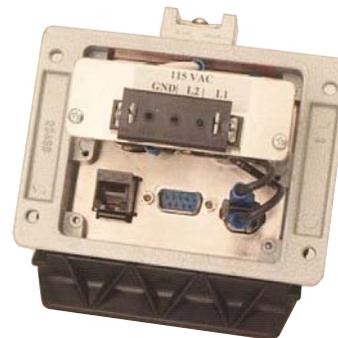

We continue to expand our product line offering for the Panel Interface Connectors as processors continue to become more efficient. We use the term 'efficient' not only for the cost, but also the speed and protocols used for communication. Currently, our offering for USB connections is limited. However, we add new parts everyday. If you do not see the part you need, please contact us and let us know.

Further, we realize that the next step for communication (and/or physical) connection for these devices will be Fire-Wire. We will continue to add new parts to this line so that we can fully support your requirements for quick, easy and safe access to your control processor.

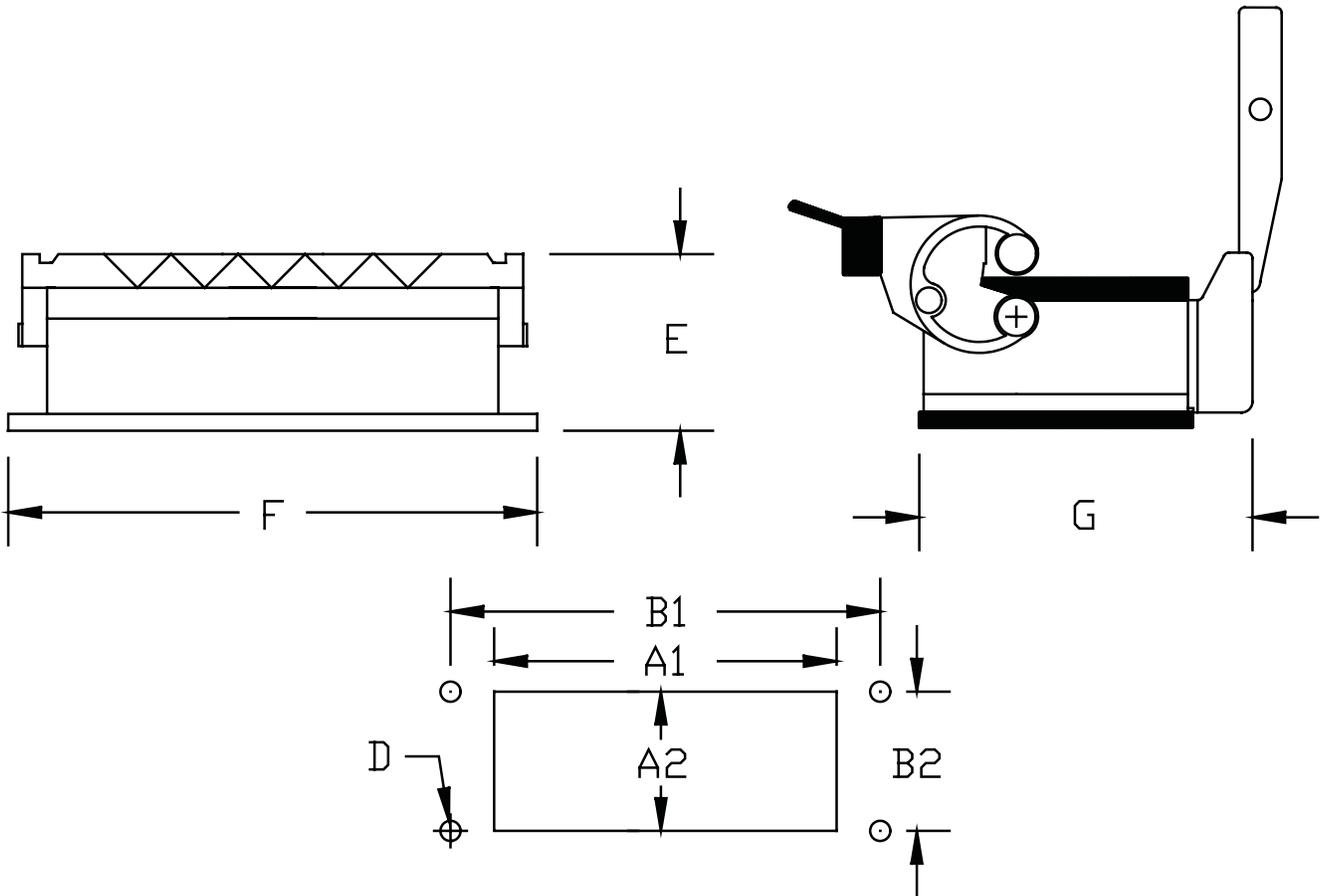

If we can assist you in your development please do not hesitate to call us at

770-534-4585 or visit our website at www.mencom.com

Punches

Punch & Die sets for Panel Interface Connectors and ILME Connectors

These punches are intended to be used with Greenlee hydraulic hand tools. The punch and die set are available for size 6, 10, 16 and 24 openings only. While punching, the drill holes for fastening the connectors are marked by the die with centermarks so that they can easily be drilled out afterwards.
